

## High Quality **Bespoke** Plantrooms & Packaged Skids

## Expertise and Specialisms

We have the expertise and experience to find solutions for the most complex of projects, delivering results to meet all requirements.

Our vast range of skills include bespoke design and specification, alongside manufacturing excellence with an emphasis on energy efficiency.

We ensure all our products are fit for purpose for both the immediate and long-term future demand and is FAT or Hydro tested prior to leaving our factory, enabling it to be ready for commissioning and installation once on site.

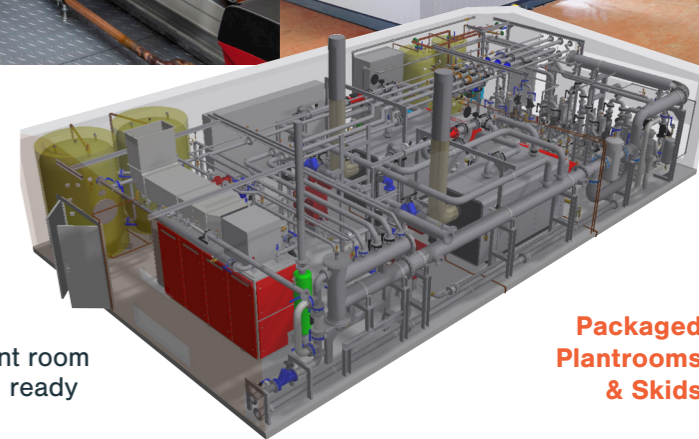

## Offsite Plantrooms and Packages

Made to meet the stringent cost and performance requirements of the construction industry.

Our solutions range from small pre-fabricated pump set assemblies through to large complex boiler and chilled water plant rooms.

We offer a full turnkey supply of all equipment within the plant room which ensures the design is complete, fully coordinated and ready for a trouble free installation on site.

Packaged Plantrooms & Skids

## Offsite Benefits

- All equipment designed and assembled in a **factory-controlled environment**.
- High productivity and **factory built high quality**.
- **Fast, efficient construction**, minimising onsite labour and project control.
- **Large systems can be supplied in sections** for reconnection onsite.
- **Project team**, including mechanical and electrical design, providing the most efficient solution.
- Accurate build to **Approved Drawings**.
- **Factory Tested** for peace of mind and product assurance.
- **Reduced site build and commissioning time**.
- **Optimum Health and Safety**, due to in-house control.
