

Where Nothing
is Standard
and Everything
is Quality Driven

Made in the UK

High Quality **Bespoke** Heating Solutions

125 Years of Trading

Ormandy Rycroft are a world leader of offsite and heat exchange solutions for all commercial and industrial sectors.

Established in 1896, we offer comprehensive manufacturing and production capabilities. Our range of products and solutions are renowned in Building Services, Mechanical and Engineering and Offshore Industries and include impressive solutions such as packaged plant room assemblies, packaged energy centres, offsite solutions and offsite plant facilities.

Fully accredited to the European and UK standards, **bespoke** vessels are built and project managed to the highest quality.

One of the few companies in the UK with the ability to manufacture Copper & Copper Lined Vessels.

Benefits of Bespoke Design

Unique and tailored designs enable the vessels to be built to suit special restrictions, with connection sizes, locations and quantities to suit the customers specific requirements.

The bespoke vessels avoid storing more water than necessary, reducing thermal losses and enabling them to be built to suit specific working pressures. This in turn, results in lighter and less expensive vessels.

Industry Sectors & Product Portfolio

				
Hotel & Apartments	Leisure & Recreation	Retail	Schools & Universities	Hospitals & Healthcare
Defense & Prison Service	<ul style="list-style-type: none"> • Packaged Plant Solutions • Electric Flow Water Heaters • Plate Heat Exchangers • Thermal Interface Units • Buffer & Thermal Storage Vessels • Calorifiers • Packaged Skids 		<ul style="list-style-type: none"> • Evoplate & Packages including Plate & Buffer • Pipework Assemblies • Unvented Packages • Aftercare & Servicing 	
				
Housing, Student Flats & Care Homes				
				
Data Handling & Local Government				

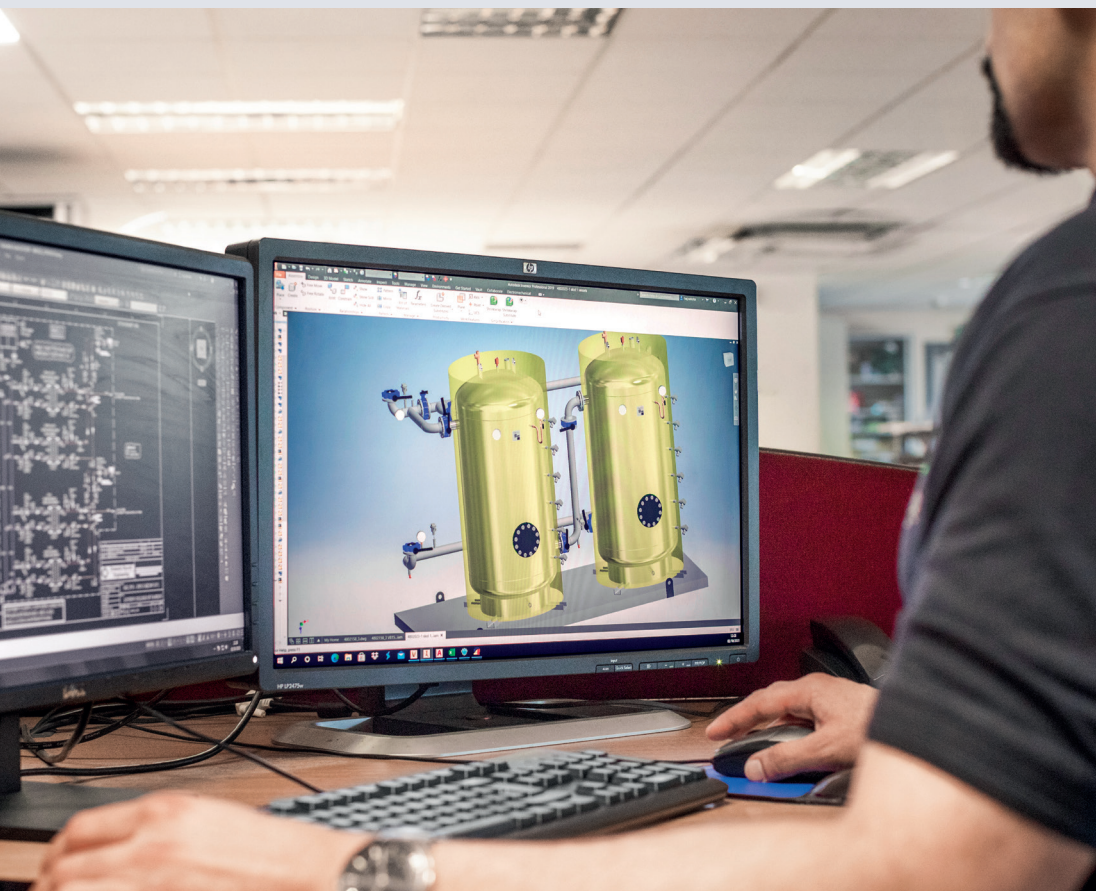

Expertise & Specialisms

Every product at Ormandy is bespoke and tailored specifically for your application at our state of the art manufacturing facility.

Our vast range of skills include bespoke design and specification, alongside manufacturing excellence, with an emphasis on energy efficiency. We ensure all our products are fit for purpose for both the immediate and long term future demand and is FAT or Hydro tested prior to leaving our factory, enabling it to be ready for commissioning and installation once on site.

Dedicated Sales Team

Our sales team are situated across the UK and are on hand to advise you on the most efficient solution for your business needs.

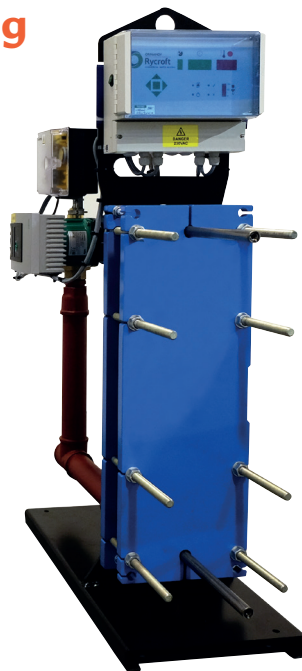

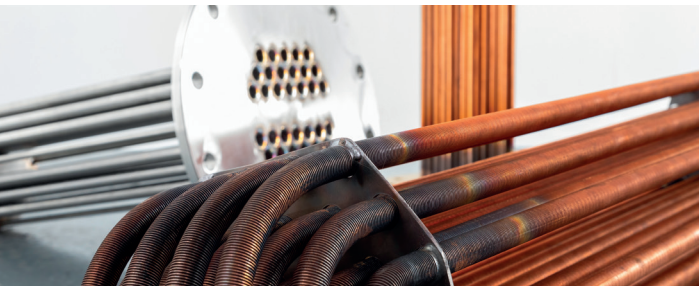

Working alongside them are our experienced project team and skilled draughtsman, engineers and welders who will deliver your solution to the highest standards and within your budget.

Commercial Hot Water Heating

Bespoke solutions built on an exceptional skill set & specialist manufacturing resources.

We are an innovative and forward-thinking company, who continuously invest in new technology. Our current portfolio and bespoke service is extensive enough to give our customers a solution that fulfils all their heating requirements using enhanced energy efficient products with lower running costs.

Offsite Benefits

- All equipment designed and assembled in a **factory-controlled environment**.
- High productivity and **factory build high quality**.
- **Fast, efficient construction**, minimising onsite labour and project control.
- **Large systems can be supplied in sections** for reconnection on site.
- **Full project team**, including mechanical, electrical & acoustic with load considerations, efficient use of space & maintainability of components.
- Accurate build to **Approved Drawings**.
- **Factory Tested Assurance**.
- **Reduced commissioning time and maintenance service**, once delivered.
- **Optimum Health and Safety**, due to in-house control.

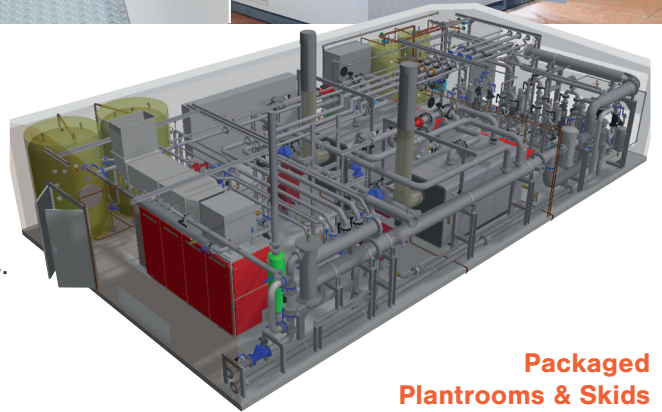

Offsite Plantrooms and Packages

Made to meet the stringent cost and performance requirements of the construction industry.

Our solutions range from small pre-fabricated pump set assemblies to large complex boiler and chilled water plantrooms.

We offer a full turnkey supply of all equipment within the plant room which ensures the design is complete, fully coordinated and ready for a trouble free installation on site.

Packaged Plantrooms & Skids

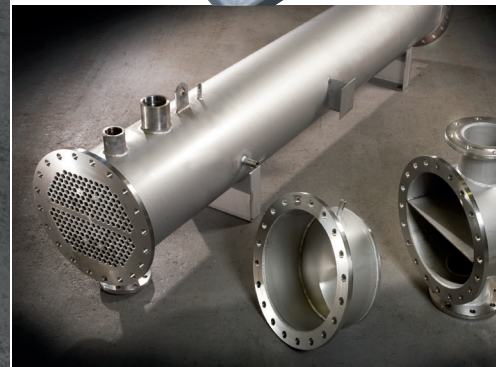

Example of a Newade hot water generation skid, designed and manufactured for a leading Pharmaceutical company to stringent engineering standards and versatile enough to handle 4600 kw of variable energy.

 **Ormandy Newade**
Bespoke Process Solutions

Established as a **front runner in stainless steel fabrication**, for highly accomplished design, fabrication, welding & polishing of stainless steel equipment.

Product Sectors

**Pharmaceutical,
Manufacturing,
Food Processing,
Petro-Chemical and
Marine and Offshore.**

Product Portfolio

- Pressurisation Sets - Spillback
- Shell & Tube Heat Exchangers
- Packaged Pump Sets
- Wash Down Packages
- Hydrophores
- Pre-Mix Units
- Process Vessels inc:
WFI & Purified Water Storage Vessels, Holding Vessels & Process Mobile Vessels.
- Condensate Pumping Sets
- Steam Pressure Reducing Station
- Steam Blowdown/Flash Vessel
- Steam Condensers
- Feed Tanks & Deaerator Head
- Clean Steam Generators
- Packaged Plant Solutions
- Flow Electric Water Heaters
- Plate Heat Exchangers & Packages
- Unvented Packages
- Calorifiers
- Buffer & Thermal Storage Vessels
- Evoplate & Package including plate & Buffer
- Packaged Skids

Process Manufacturing & Specialist Services

Working with industry leaders, Ormandy Newade manufacture vessels with higher specifications and bespoke calculations required for specialist industrial markets.

Project management and a team of skilled craftsmen are key elements to designing a bespoke vessel, often with task specific functions and incorporating stringent requirements.

Assurance & Quality

Products supplied in accordance with EC Directives, including PED. Electrical equipment is compliant with IEE regulations and in accordance with the relevant EMC Directives and carries the CE marking where applicable. Welder approvals in accordance with BS EN ISO 9606-1 2017 and welding procedures with BN EN ISO 15614-1:2004 + A2:2012 for PED and ASME IX. Test results endorsed by Notified Bodies and independent material laboratories.
